

SureColor™ SC-F Series dye sublimation printers

Superior performance
Exceptional quality

EPSON®
EXCEED YOUR VISION

A total solutions provider

From hardware and ink to media and software, the SureColor SC-F dye sublimation series combines speed, strength and productivity.

The series offers a complete business solution, developed entirely in-house by Epson to deliver innovation at every level – for superior textile, soft signage, interior and promotional printing, whether for sports, fashion, home decor, or promotional applications.

Match your business needs with a choice of models in formats up to 64in printing at 108.6m² per hour, and the option of High Definition HDK black ink for specialist fashion and apparel printing.

Add Epson's comprehensive service and support, and you have a complete printing solution with the quality and flexibility to meet your every business need.

A synchronised print solution

Reliability and peace of mind; Epson prides itself in developing technology so products work in harmony to achieve excellent results.

Ease of use and less disruption; incorporating innovative technologies such as automatic printhead maintenance and advance tension control, expand production capacity and avoid costly downtime.

Service and support; one year warranty as standard and various extended service options to suit any need whilst ensuring peace of mind.

Future-proof and innovative; the SureColor SC-F dye sublimation series is supported by Epson's Independent Software Vendor community, so additional applications are always being developed, and always available.

Complete your business

When choosing a printer, you're making a decision that will greatly impact your growth. Whether you rely on unwavering productivity for high-volume sports apparel printing, or achieving stand-out quality on the most intricate details for fashion and home decor, the SureColor SC-F dye sublimation series can help unlock the potential of your business.

Sports apparel

Achieve high productivity with a low total cost of ownership – ideal for producing high volumes of football shirts, cycling wear, swimming wear and more, all in standardised designs you can rely on.

Fashion

Let your creativity run wild with a wide colour gamut and high quality results. For fashion designers and entrepreneurs, the SureColor SC-F dye sublimation series delivers colour stability and high definition blacks, and is easy and quick to maintain – ideal for dynamic and demanding environments on a wide range of textiles, whether you're printing a single garment or a longer run.

Home decor

Meet any expectations in the production of curtains, blinds, upholstery, cushions, ceramic tiles or any hard substrate using a polyester coating. Interior designers and brand owners are assured both quality and sharp photo realistic detail well-suited to styling any commercial or domestic space.

Promotional items

Produce all types of promotional items with ease and give the personal touch with high quality output to phone cases, bags and mugs. Photo labs, online retailers and manufacturers will be proud of their high quality products, while assuring their business a low total cost of ownership, with the SureColor SC-F dye sublimation series.

Soft signage

Make sure your message is understood with large format signage that really stands out. Now print service providers, reproduction shops and advertising houses can use increasingly popular polyester fabrics for use in soft signage.

Introducing the SureColor SC-F dye sublimation series

Take creativity to new levels with Epson's total solutions for dye-sublimation printing. Choose the right model to match your volume, size and format requirements, and enjoy seamless, top-to-bottom performance.

SureColor SC-F9300

Epson knows that productivity is key, which is why we develop all components to deliver optimal performance and avoid downtime. With the SureColor SC-F9300, you can be assured that all technology – hardware, inks and software tools – work perfectly together, to achieve exceptional print quality.

Choose the SureColor SC-F9300 and discover a new level of speed, quality and accuracy.

- Achieve quality prints every time with precise ink drop placement from controlled airflow with the printhead guard
- Productivity is enhanced as the fabric wiper automatically cleans the printhead to achieve sustained print quality
- The ultra-sophisticated feeding system, pressure rollers and electronic pressure control optimise grip and feeding accuracy to produce perfect prints across a range of paper weights
- High take up reel accuracy enables stable transfer process with calendar machines
- Maintain efficiency with a fluff dust catcher that prevents dust from entering and clogging the printheads
- Improve print quality with the new hybrid flat and rib platen to reduce paper unevenness
- Verify results immediately with LED lighting and a transparent front cover

SureColor SC-F7200

The complete solution for printing superior quality textiles and soft signage.

- Print up to 64in (1625mm) wide and up to 58.9m² per hour
- Highly reliable auto take-up reel with high rewinding accuracy
- Quick-drying supported with post-platen heater
- Single-operator media loading, automatic media tensioning
- Robust roll paper holder to prevent paper moving during printing
- Add HDK black ink for enhanced black density printing on specialist fabrics

SureColor SC-F6200

Perfect for low to medium volumes printing on textiles and rigid substrates.

- Print up to 44in (1117mm) wide and up to 63.4m² per hour
- Integral, easily refillable 1.5 litre ink system
- 2 litre waste bottles for easy, cost-effective ink disposal
- Includes HQ mode for photo-quality rigid substrates printing as standard
- Add HDK black ink for enhanced black density printing on specialist fabrics

Precision hardware, perfect results

At the heart of Epson's SureColor SC-F dye sublimation series are technologies developed exclusively for Epson products. They are used all over the world – enabling maximum productivity, superior results and low cost of ownership.

Intelligent imaging

Epson UltraChrome DS ink produces vibrant colours, sharp contours and smooth gradations, with excellent light/wash fastness, and abrasion/perspiration resistance. As a result of developing our image processing technology, PrecisionDot high-quality mode combines three technologies (Half Tone Module, LUT and Micro Weave) to improve the quality.

Quality you can rely on

Made with laser-welded frames², precise imaging technology and employing advancements from Epson's own robotic solutions, each printer is made to demonstrate Epson's total commitment to delivering quality.

Premium image quality

The Epson PrecisionCore TFP printhead produces exceptional image quality thanks to its 360dpi printhead nozzle configuration, producing a maximum resolution of up to 720 x 1440 dpi.

Comprehensive service and support

In the unlikely event of a problem with your SureColor SC-F series printer, you're covered by a one-year warranty as standard, with the option of extended coverage.

Maximise your output

Epson Edge Print software offers enhanced control of print output. Simply install the hardware and RIP software and gain access to features, which include Preview, Hot holder, Copy, Trimming, Nesting Tiling and Step & Repeat.

Epson Edge Print software works intuitively with other Epson tools, like the browser-based Control Dashboard¹, which allows you to set up customised print settings quickly and easily. Epson's LFP Accounting Tool also helps you calculate the value of each print, based on ink and paper consumption – giving you better visibility and provisioning on each job.
