

SureColor™ SC-F Series dye sublimation printers

HIGH PERFORMANCE, SUPERIOR FINISH

EPSON®
EXCEED YOUR VISION

THE IDEAL FIT FOR A RANGE OF APPLICATIONS

Get creative and explore the potential of superior dye-sublimation printing with the SureColor SC-F Series range. The possibilities are endless, from one-off or high-volume sportswear to promotional merchandise, household furnishing and high-impact signage.

Always in fashion

Keep up with changing consumer demands using a wide choice of colour, fabric and design options. Whatever your style and whether you're printing a single garment or a longer run, you can really set your creativity free.

Outstanding interiors

Crisp photo personalisation is just the start for interior decoration. Take a new look at curtains, blinds, wall hangings, upholstery, cushions and beanbags, as well as ceramic tiles and just about any plastic, MDF or metal surface.

Versatile, high impact visuals

Make sure your message is understood with large format signage that really stands out. Now you can use increasingly popular polyester fabrics as well as PVC, vinyl and paper for your flags, banners and exhibition graphics.

Creative giftware and promotional products

Release the potential of the dye-sublimation process and create striking personalised accessories from wallets and smartphone cases to mugs, backpacks and much more.

THE COMPLETE TEXTILE PRINTING SOLUTION

From hardware and ink to media and software, the SureColor SC-F Series combines speed, strength and productivity to deliver superior textile, soft signage, interior and promotional printing.

Match your business needs with a choice of models in formats up to 64in printing at 100m² per hour, and the option of High Definition HDK black ink for specialist fashion and apparel printing.

Add Epson's comprehensive service and support and you have a complete printing solution with the quality and flexibility to keep your business moving.

DELIVERING INDUSTRY LEADING QUALITY AND PERFORMANCE

Take creativity to new levels with Epson's total solutions for dye-sublimation printing. Choose the right model to match your volume, size and format requirements and enjoy seamless, top-to-bottom performance.

SureColor SC-F9200

Make long print runs easy with this fast and consistent textile printer. Choose the SC-F9200 and discover a new level of speed, quality and accuracy.

- Twin Epson PrecisionCore TFP printheads for higher throughput and longer production life
- Fast printing up to 100m²/hr draft mode, 56m²/hr production mode, 27m²/hr quality mode
- Print on a wide range of dye-sublimation transfer papers up to 64in (1625mm) wide
- Highly reliable 40kg auto take-up reel with rewinding accuracy of +/- 2.5mm
- Quick drying with post-platen heater supporting 30-55°C
- Integral, easily refillable 2 x 1.5-litre bulk ink system with 1-litre pouches for easy maintenance and long print runs
- Epson UltraChrome DS Ink for vibrant colours, sharp contours, smooth gradations, excellent light/wash fastness and abrasion/perspiration resistance
- Add HDK black ink for enhanced black density printing on specialist fabrics

SureColor SC-F7200

The complete solution for printing superior quality textiles and soft signage.

- Print up to 64in (1625mm) wide and up to 58.9m²/hr
- Highly reliable auto take-up reel with high rewinding accuracy
- Quick-drying supported with post-platen heater
- Single-operator media loading, automatic media tensioning
- Robust roll paper holder to prevent paper moving during printing
- Add HDK black ink for enhanced black density printing on specialist fabrics

SureColor SC-F6200

Perfect for low to medium volumes printing on textiles and rigid substrates.

- Print up to 44in (1117mm) wide and up to 63.4m²/hr
- Integral, easily refillable 1.5-litre ink system
- 2-litre waste bottles for easy, cost-effective ink disposal
- Includes HQ mode for photo-quality rigid substrate printing as standard
- Add HDK black ink for enhanced black density printing on specialist fabrics

SPECIALIST HDK BLACK INK FOR FABRIC PRINTING

Achieve truly outstanding colour performance by incorporating high density HDK black ink into your total printing solution. Specially developed for the textile market, its superior black density means more natural shadows and hues and easier control of grey scale. It can even help to reduce overall ink consumption¹.

THE COMPLETE EPSON SOLUTION

With the SureColor SC-F Series you get so much more than a printer, because a total solution delivers benefits from start to perfect finish. From hardware, printhead, ink and sublimation papers to warranty and servicing you'll find that everything works together smoothly and reliably.

HIGH PRODUCTIVITY, SUPERIOR QUALITY

The heart of our printers is the high-performance dual PrecisionCore TFP printhead. This delivers exceptional quality at high speed, and works with our specialist inks, large after heaters and accurate take-up and rewinding systems (see model specs for details) to ensure exceptional results at high speeds. These printers are also Oeko-Tex certified².

LOW TOTAL COST OF OWNERSHIP

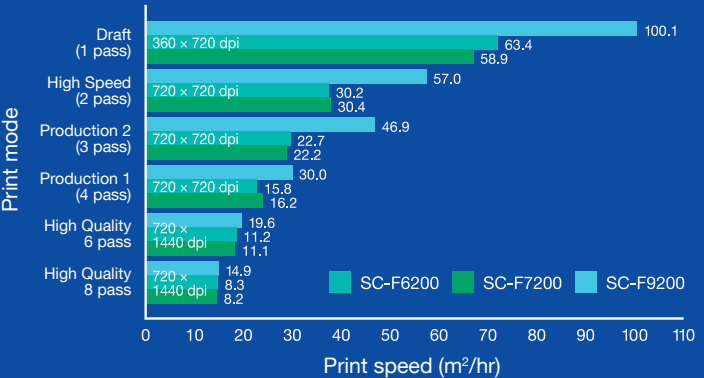

We work hard to keep performance high but costs low. Features such as high-capacity inks and HDK black help to reduce overall ink consumption³. Also, our genuine inks and PrecisionCore printhead work perfectly together to keep downtime to a minimum and low power consumption helps to keep energy costs down.

EXCEPTIONAL SERVICE AND SUPPORT

Enjoy peace of mind with the standard one year warranty, or upgrade to one of our extended options for more specialist ongoing cover. Choose one of our managed print service programmes and we can help you to get the very best out of your printer and reduce costs⁴ even further.

SUPERB QUALITY AT HIGH SPEED

Produce great results very quickly with seamless printing from start to finish. From highly accurate paper handling and precision printheads to fast-drying, durable inks, you can satisfy high standards and meet tight schedules, time after time.

PRECISION HARDWARE, PERFECT RESULTS

Every aspect of the SureColor SC-F Series is designed to play a crucial part in the seamless delivery of a total, start to-finish colour printing solution.

Laser-welded chassis

Rely on clear, crisp, consistent results thanks to significantly reduced shudder from the high-rigidity, laser-welded frame created by precision-engineering and robotic technology.

High volume ink system

Leave your printer running for longer and enjoy complete peace of mind with the integral, refillable 1.5-litre bulk ink system (2x1.5-litre on the SC-F9200). Keep maintenance to a minimum and reduce waste with 1-litre pouches for easy refilling.

Accurate winding, fast drying

Quality is assured with highly accurate winding (+/- 2.5mm), a perfect match for the calender heat press systems found in the digital textile industry⁵. At the same time, productivity is enhanced with a post-platen heater that supports 30-55°C. (Both features standard on the SC-F7200, SC-F9200).

Better Products

PRECISIONCORE

EPSON ULTRACHROME
DS INK

¹ Compared to normal UltraChrome DS black ink. ² The four colour Epson dye sublimation inks used in the SureColor SC-F9200/SC-F7200/SC-F6200 Series printers, when applied to polyester fabrics, pass the requirements of the Oeko-Tex Standard 100 for human ecological requirements of Class I products for adults, children, and babies up to 36 months. Oeko-Tex Standard 100 specifies testing criteria for the presence of harmful substances within a textile product. The standard belongs to the International Association for Research and Testing in the field of Textile Ecology (Oeko-Tex). ³ Compared to results achieved with UltraChrome DS ink-set using normal black ink. ⁴ Print & Save is currently available in Great Britain, Italy, France, Germany, Portugal, Spain, Belgium, Denmark, Finland, Luxembourg, The Netherlands, Sweden, Poland, Romania (list accurate FY15). For more information, please visit www.epson.eu/printandsave ⁵ For optimum quality, leaving the printed roll to dry may be recommended. Consult with local Epson representative for further information.
