Consistent high quality printing

Epson's market leading engineering means our Micro Piezo technology, high-performance dual PrecisionCore TFP printheads and HDK Black in the UltraChrome DS ink-set ensure superior quality images are delivered consistently, time after time, at high speeds.

Textile producers

The series uses Epson's new High Density (HDK) Black ink which has been specifically designed for the textile market. Using it over high volume, roll-to-roll textile production runs will deliver superior black density, more vibrant colours and more neutral hues on clothing, sportswear and soft furnishings.

Photographic studios

With Epson UltraChrome DS ink and our market-leading print technology, you can produce stunning, durable prints in high resolutions of up to 720 x 1440 dpi. Accurately reproduce images on textiles or polyester-coated hard substrates up to 64-inches (1,625mm) wide using specifically engineered transfer media.

Promotional goods manufacturers

Produce high-quality printed sportswear, work wear and fashion apparel, soft signage as well as promotional goods such as mugs, phone covers and mouse mats quickly and efficiently. Enjoy low total cost of ownership thanks to a complete Epson dye sublimation printing solution.

KEY FEATURES

Advanced, reliable technology

- Epson printhead technology not only ensures precision dot control, delivering outstanding clarity and sharpness on garments, but using this with genuine Epson ink minimises cleaning, maintenance and downtime
- Large after heater for high speed drying, supporting 30 to 55 degrees Celsius¹
- Highly reliable 40kg auto take-up reel with rewinding accuracy of +/- 2.5mm, ideal for calendar heat press systems
- Large volume print runs can be left unattended thanks to refillable 1 Litre ink tank pouches
- Approximate print speeds (1 pass) of up to 100m²/hr.
- Available with Epson's managed print service programme to help reduce costs²

Superior high density black ink

- HDK Black ink, part of the UltraChrome DS Ink range has been created for use in textile production and provides superior quality results with excellent black density
- Grey scale control helps produce more natural hues, vibrant colours and dense shadow areas
- HDK Black Ink reduces total overall ink consumption³

The complete textile printing solution

The SureColor SC-F Series provides a complete, one-stop solution tailored to the needs of textile manufacturers, clothing suppliers and print service providers.
