DATASHEET / BROCHURE

Produce high-quality colour labels in-house and on-demand with this reliable and cost-effective industrial printer.

Aimed at customers for whom print quality is key and who primarily want to print onto glossy media, the C7500G is the ultimate in short-run colour label printing. Manufacturers can reliably and cost-effectively meet their in-house labelling needs with outstanding speed and quality. The C7500G can also help eliminate the costs associated with pre-printing by producing short-run, customised labels on-demand.

## Reliable and consistent results

The C7500G can help manufacturers produce consistent, high-quality labels in-house and on-demand. The printer features the new PrecisionCore printhead to ensure reliable, high-quality results. Our unique Nozzle Verification Technology (NVT) and dot substitution help prevent misprints and dead pixels for consistent printouts.

## Fast speeds

Produce a range of high-quality labels, fast including those for food and beverage products, packaging and boxes, as well as EU Energy Labels and GHS Labels. With print speeds of up to 300mm/sec, you can now print labels in full colour, at the same speed as some incumbent thermal monochrome printers.

## Cost-effective

Printing labels on-demand helps eliminate costs associated with pre-printing, such as label waste and large label inventory. High-capacity, individual ink cartridges mean only the colour used will need to be replaced, offering very low cost per print. The permanent printhead offers significant cost savings, and a guaranteed peace of mind as none of its major components will need replacing for at least 500km worth of printing<sup>1</sup>.

## Easy to use with minimal maintenance

With its LCD control panel, set-up is easy. Our newest printer command set, ESC/Label, allows integration with virtually any operating system. The device also comes with a full range of software utilities to support printer deployment. NVT also helps to prevent clogged nozzles.
