

The SC-V7000 is Epson's first UV large format printer and allows sign and display makers to expand their portfolio of products.

The SC-V7000 offers exceptional image quality and the flexibility for you to print on a wide range of media. It's been developed for printing eye-catching indoor and outdoor signage, window displays, hoarding panels, packaging, promotional goods and decor products. It offers a versatile range of applications, which enable you to expand your product offering and deliver consistently high-quality results. This printer features Epson's unique UltraChrome UV ink configuration, including red, grey, white and varnish.

High-quality prints

This UV flatbed printer delivers outstanding print quality and vivid colours, as the UltraChrome UV 10-colour inkset enhances prints for stunning results. The white ink provides versatility for printing on a wider range of products – either applied as a base layer on coloured media, or to create versatile backlit prints. Similarly, the varnish offers flexibility, as it can be applied all over the image or as a spot colour to accentuate specific textures and effects.

Productivity

The SC-V7000 enables businesses to print at high speed with a maximum print area of 2.5 metres by 1.25 metres. The printhead layout enables simultaneous high-speed printing, with white ink and varnish, without losing productivity.

Material versatility

Users can print onto a wide range of substrates up to 80mm thick including: acrylics, polycarbonates, PVC, glass, aluminium, metal, polyester, foamboard, styrene, wood and stone. And with the 4-zone vacuum system, it offers real flexibility for production environments.

Usability

The printer automatically adjusts the printhead height depending on the media thickness and also includes a crash sensor to avoid potential head crashes. The ionizer helps eliminate and reduce the static charge on the media so that ink drops are not deflected, but land in the correct place, meaning that print quality is consistently maintained.

KEY FEATURES

- **Outstanding print quality**
UltraChrome UV 10-colour inkset
- **High speed printing**
Simultaneous printing even when using white, colour and varnish
- **Maximum print size**
2.5m x 1.25m
- **Wide range of media**
To expand product offering potential
- **The complete Epson solution**
Including printheads, ink, firmware and software
