SureColor SC-P700

The high-quality photo printer (up to A3+) for design-conscious photographers

The SureColor SC-P700 has been developed for professionals, semi-professionals and ambitious amateur photographers who have a keen eye for detail and an appreciation for high-performance hardware that's aesthetically pleasing. The SC-P700 manages to combine form with function, to great effect. The accuracy and quality of the output is further enhanced by the deepest blacks and an expanded blue colour gamut.

Image accuracy and depth
The SC-P700 photo printer has been developed with outstanding print quality as standard. Increased black density for better gradation, deeper blacks, and less graininess, is achieved through UltraChrome Pro 10 ink, the new F10 printhead and black enhance overcoat technology (BEO) for finer detail and texture in black areas. The blue colour gamut allows the user to more accurately reproduce the image seen on screen.

Image accuracy and depth
Aesthetically pleasing, understated design
Image accuracy and depth
As pleasing to the eye as the prints it produces, this photo printer has been beautifully designed without compromising print quality, reliability and functionality. The clean, compact, discreet design blends into most creative workspaces or home studios. The unit is completely sealed to protect against dust/dirt.

Easy to use
The simplicity of the design is complemented by the SC-P700's ease of use. It features a customisable user interface, internal lighting, spindle-less and integrated roll paper unit, fine art paper feeding from ASF, easy media profile setting, printing from smart devices, and no black ink change with the new F10 printhead for 10 colours.
